

Scope of work

1. The documents intend to cover the procedure for field trials of HF Radio sets.
2. The actual performance of the radio set will be assessed during the field trial of equipment in the operational area in presence of vendor/representative of firms to ascertain the user satisfaction before the proposal is accepted.
3. The document intends to ensure that the OEM/Supplier follows the accredited standards and guidelines and meets all the Technical Parameters & Safety Standards.
4. HF Radio is tested / evaluated as per laid down procedures.
5. Use of this procedure is envisaged for any application of similar equipment.
6. The user should review the required standards needed for the specific application.
7. The Test Jigs, Cables, Programming software and other necessary accessories to be provided by the firm before the evaluation.
8. The parameter data in test report after every measurement to be recorded.
