Subject: CCTNS connectivity through SWAN

Dear Sir,

The Crime and Criminal Tracking and Networking System (CCTNS) is the flagship e-Governance program of the Ministry of Home Affairs (MHA) conceived as a Mission mode project (MMP) under the National e-Governance Plan (NeGP).

2. The rollout of the project has already started and as per the scheme, BSNL would be the network service provider for connecting 20,000 plus locations which includes Police Stations and Higher Offices of the Department across PAN India. As per the connectivity proposed, BSNL has to give 1<sup>st</sup> priority of connecting the above said locations on SWAN followed by VPNoBB (VPN over Broadband), WIMAX and VSAT network respectively.

3. The Memorandum of Understanding (MoU) has already been signed between CCTNS central Nodal Agency, i.e., NCRB and BSNL. In this regard, you are requested to ensure that the following are adhered to for implementation of the CCTNS Project in time:

- DIA (APPT)  
me  
Sir (at)  
S. A.
- Extending connectivity and keeping one port (V.35 or G.703) reserved at each SWAN POP for connectivity to Police Stations
  - SWAN PoPs to be made operational during Saturdays and Sundays including National/State holidays and be made available on 24 x 7 basis
  - CCTNS sites which are within 500 meters of SWAN POP will be considered as co-located sites. The connectivity for such sites will be provided by SWAN network operator for which the cost will be borne by State/UT. Sites within 100 meters will be connected on Ethernet cable and sites beyond 100 meters and less than 500 meters will be connected on OFC for which costs will be borne by State/UT from ACA funds.
