

North Block, New Delhi  
Dated: 13<sup>th</sup> December 2011

To,

All the Nodal Officers of States/ UT's, CCTNS

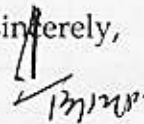

Subject: Provision of one port for CCTNS Project at each available SWAN PoP by DIT

This is in reference to the network connectivity for the Police Stations at the States/ UTs under CCTNS Project. The provision of the Network Connectivity to the Police Stations and Higher Offices through SWAN POP is an essential part in the implementation of the Project. In the context, it may be noted that, DIT has agreed to reserve one port for CCTNS at each SWAN POP in all the States/ UTs across the country. The availability of the port for CCTNS network will be ensured by the respective State- DIT. DIT (Centre) will issue the guidelines to State/ UT DITs for the same.

2. The port availability at each POP will ensure SWAN connectivity to any one Police Station associated with it. In case, multiple Police Stations are feasible from one POP, the preferred Police Station for the SWAN connectivity needs to be decided by Nodal Officer. Preferably, a Police Station with higher work load should be placed on SWAN POP.

3. DIT, New Delhi has also clarified that connectivity in co-located sites will be done by SWAN operator and the cost for which shall be borne by State- DIT. Co-located site is defined as one which are under 500 meters of the POP. In that, those within 100 meters should be connected by Ethernet and those between 100- 500 meters should be connected by laying OLC, the cost of which shall be borne by State- DIT through Additional Central Assistance (ACA) fund.

Yours sincerely,

  
(A.K. Singh)

Director (CS)
